

Course Title: Communications Laboratory Work

Course Code: ETEG 403

Credit Hours: 1

Course Description:

This course intends to reinforce the concepts learned in those theory classes that have a strong practical applications emphasis, by a series of relevant experiments carried out in the laboratory.

Course Contents:

A series of experiments to reinforce the subject matter taught in 'ETEG402: Antennas and Propagation', 'ETEG408: Microwave Devices and Systems', and 'ETEG422: Optical Fiber Communication'. The exact courses covered by laboratory work may vary.
