

Course Title: Communications Laboratory Work

Course Code: ETEG 405

Credit Hours: 1

Course Description:

This course intends to reinforce the concepts learned in the Digital Switching and Tele-traffic Engineering and Wireless communication theory classes that have a strong practical applications emphasis, by a series of relevant experiments carried out in the laboratory.

Course Contents:

A series of experiments to reinforce the subject matter taught in courses Digital Switching and Tele-traffic Engineering and Wireless communication taught in 4th year 2nd Semester including elective courses. The exact courses covered by laboratory work may vary.

Evaluation:

In-Semester Evaluation: 80%

End-Semester Evaluation: 20%
