

TITLE OF THE PROJECT

Project Members:

Member1 (41031)

Member2 (41032)

Member3 (41033)

Supervisor:

Dr. Shailendra Kumar Jha

Assistant Professor

Department of Electrical & Electronics Engineering

9th November 2019

OUTLINE OF PRESENTATION

- ☐ Background and Introduction
- ☐ Problem definition
- ☐ Literature Review
- ☐ Objective of the Project
- ☐ Significance of the Project
- ☐ Project Methodology
- ☐ Expected Results
- ☐ References

BACKGROUND AND INTRODUCTION

- ☐ This section deals with the basic background of the project work.
- ☐ Describe what the project work is about. May contain the system description diagrams.
- ☐ Use Times New Roman 28 fonts for all slides
- ☐ Use more slides if required, do not decrease the fonts size
- ☐ Use white background with dark color letters
- ☐ (1-3 slides)

PROBLEM DEFINITION

- ☐ This section presents why you are going to do the project work, what problem of the system/sector will the project address
- ☐ Use bullets to point out the issues
- ☐ (1 slide)

LITERATURE REVIEW

- ❑ This section presents what others have done in the area similar to the project work being carried.
- ❑ Put in bullets about some of the work relevant to your project
- ❑ (1-3 slides).

OBJECTIVE OF THE PROJECT

- ☐ Mention the main objective of the project work
- ☐ Mention few specific objectives that helps to achieve the main objective
- ☐ (1 slide)

SIGNIFICANCE OF THE PROJECT

- ☐ This section describe how the project would help to improve the performance of the system/sector under study
- ☐ Use bullets to point out the improvements
- ☐ (1 slide)

PROJECT METHODOLOGY

- ☐ Describe here the how you will carry out your work in steps- starting from literature review to results.
- ☐ This section may have flow chart to explain the steps/approaches of the project to be carried out.
- ☐ The working approaches: simulation software / circuit design / field survey etc. are to be explained
- ☐ Timeline, budget and limitations of work are to mentioned
- ☐ (2-6 slides)

EXPECTED RESULTS

- ☐ The project expected result/outcomes are to be presented.
- ☐ The expected results would be the outputs of your system compared to desired(theoretical) outputs for experimental or simulation works.
- ☐ The expected result could be the system/circuit designed and its detailed features
- ☐ (1-2 slides)

REFERENCES

- ☐ Mention the references you have cited in the proposal/report. (1-3 slides, decrease font size if the list is large)
- ☐ **It is not Bibliography** (so do not mention any name if you have not cited that in the text of your proposal/report)
- ☐ Use IEEE format for reference (as suggested)
- ☐ Example would be as under:

S.K. Jha , P. Stoa, K. Uhlen “Microgrid: Prospects and Challenges in Nepal”, IEEE Conference on Power and Energy Systems: Towards Sustainable Energy Systems (PESTSE2014), March 13th-15th, 2014, Amrita School of Engineering, Bangalore, India

...thank you ...
