

Course Title: Analog Communications Laboratory Work

Course Code: ETEG 307

Credit Hours: 3

Course Description:

Reinforce the concepts learned in those theory classes that have a strong practical applications emphasis, by a series of relevant experiments carried out in the laboratory.

Course Contents:

A series of experiments to reinforce learning of the subject matter taught in 'ETEG302: Analog Communications' and ETEG 313: Signal & Systems. Ten to twelve practical works needs to be done combining the experiments related to the two courses.
